Jeanne has been actively involved in designing and managing large senior, medical, and dental projects for over 29 years. She has a proven track record of providing personal service through an integrated team approach. This hands-on, full-scope approach has fostered long standing client relationships and an excellent reputation for achieving perfection in her jobs.

Jeanne is an energized, organized and enthusiastic designer whose commitment to interior design has provided her with the broad and diverse experience necessary for the management of projects throughout their execution.

Inspired by her attendance at the National Health Care Symposium, she became a charter member of the AIA Academy for Health.

A graduate of California State University, Jeanne holds degrees in both business and design. She was also a national recipient of the 1992 Design Merit Award for Unaccompanied Enlisted Personnel Housing, and 2004, 2005 and 2007 awards for Outstanding Commercial Project in Yuba City. She is accredited by the State of California as a Certified Interior Designer and currently holds a California Contractor's License. She has owned Design Directions, a prominent healthcare interior design firm, for over 20 years before joining Western Contract.
