THE FAMILY ZONE BECOMES FUNCTIONAL AND COMFORTABLE:

Evidence-based design research shows that patient outcomes improve with the presence of family members during recovery. Until now, traditional hospital furniture combined with space constraints made it challenging for families to be a part of the healing, care, and support of a loved one.

sleepToo™ occupies only **20 square feet of space** while delivering huge benefits to patients, family and staff including:

- Dining
- Working
- Sitting
- Visiting
- Sleeping
- Reclining

sleepToo™ allows existing spaces to be repurposed for storage or opened up as free floor space or for other uses. Maintaining fewer additional furnishings is another indirect benefit sleepToo provides.

sleepToo™ is the real solution for family-involved care. **It's a virtual family room.**

Wieland furniture is well worth waiting in. It invites people to sit, to relax, to find at least a small measure of peace. And we've put a great deal of thought into that invitation. After all, waiting can be one of life's most important activities. Think of waiting for the birth of your child. The diagnosis of an ailing parent. The recovery of a friend and that friend's return home. Or your own consultation with a specialist. Waiting is often a necessity. Wieland helps make it easier.

dining A pleasant setting, a caring companion, a good meal — each in its own way nourishes.

When choosing dining room furniture, it often comes down to finding the style, color and finish that's most appropriate for your environment. You also need a broad range of solutions that address space limitations...the need for flexible, accommodating seating arrangements...and the maintenance of a clean, comfortable, and engaging atmosphere. Wieland offers those solutions.
